*Music comp.rec.mix at the Gáyan Uttejak Studio,Bp.
by L.Hortobágyi - Gáyan Uttejak Orchestra. 1997*

el-Horto Sound-System

(this application was used between 1988-2000)

It is not needless to mention that each of the ethno-musical elements in the music of *Gáyan Uttejak Orchestra -László Hortobágyi* - that seems to be original and traditional - are digital reedified and restructured. None of the figuring ethno,vocal,instrumental phrases are in the reality: they consist of small resynthesized samples (20 msec - 9 sec) and digital assorted and rearranged of the original local sound recordings. It's technological basis are a *PCM*-morphology using up the old *FFT* spectrum analysis as an algorhythm controller (like "convolution") and a virtual overtone processing synthesis software developed by *L.Hortobágyi* fifteen years earlier like *Melodyne* or *Kyma*-system of nowadays. The new live program's repertoire also based on the classical Indian instrumental technique of the *Gáyaki-Ang* and the *Tablá-tarang* polyrhythmic structure mixed with this earlier developed sound morphology of the granular systhesis technique according to his original " *computed memesis of music*" concept.
