After the disappearance of nation-states about 70 years ago and the unconsciously driven global capital structures - optimized solely for profit-growth (*profiteering*) - completely destroyed all traditional social forms, so that the demographic situation of saturated geographical units, no longer suitable for capital allocation, exploded, all one accompanied by (*glacial* or *anthropogenic*) climate change is culminating today.

The current "*World Systema*" (as the most primitive life-form, which has a terribly destructive impact on social consciousness), represents the unimaginable - and totally unknown to mortal man - destruction and global dead-end of corporate share ownership (thus of dispersed irresponsibility).

This "*Systema*", of course, can only work successfully in a society that has been dumbed down to the extreme.

Here and now, the *migrant-gender* issue is also really a *consumer system* issue : in the *Bermuda* triangle of the market production-profit-cycle, it is irrelevant whether one is European, white or black and of what religion or gender, but if a location becomes saturated (the realizable gains of "redistribution" – *the increment*) are reduced, then a slave homeostasis of consumer 'productive capacity', i. e. „*Systema*”-sustaining human digestive pits and stupid voters, must be implanted there (*globalisation*), treated like *nutella* and supported by (originally very humanoid motivation) basic income (UBI), otherwise it is all over (*globaloma*).

Contrary to previous practice, therefore, the inclusion and socialisation into the public consciousness of the remaining pigment-rich civilisations with different

cultures, or even the previously criminalised *LGBTQQRSTVZXY* minorities, etc., suddenly become important, all of which increase the consumer-voter capacity of the „*Systhema*”.

For a while...

Now everyone matters! - after exploitation of land owned and depleted by white people.

Providing large-scale corporations on a global scale in these areas has become limited and further unprofitable, so the syncretic age of the new humanism has come.

Under its logo, through administrative domination (*Big Data*) technologies of the “*deep-state*” in the tax structure of *Universal Basic Income* the returns from increased consumer capacity are in fact decant off, trickily, by the big companies involved locally and globally, thus puppetising the democratic "*Systhema*" ethos of the so-called market economy, sanctioned by the EU parliament. So the "*income*" of the community (state) owned believing and taxpaying citizens is converted into the portfolios of corporations, all ideologised by the EU-Union comprador administrators and *Media* and the re-converted redistribution is organised EU-continental. Today, the development of Facebook's "*Meta*" offers, in addition to real registrations, virtual "*Avatar accounts*" of unlimited quantity, which multiply the purchasing capacity previously tied to one person, thus increasing the consumer efficiency of "*recyclical chakra*" in infinite space - and postponing the collapse of the "locality" that is saturating cyberspace.

Most citizens of "*advanced democracies*" are motivated by the conviction that they must vote against an out-of-control system, free of any self-limitation, but the more intelligent have already realised that they are incapable of exercising real political power, and that their endless series of elections only legitimise their own basic servitude.

"*Systhema*" has an indirect effect on sociostasis, creating a monochrome, dematerialized, all-digitizing "*Davos Culture*" in which today only pure alienation thrive, and where social anomie crushes biological norms and chip away the human body.

Aliens tearing each other on the planet.

And the comprador administration of Europe, closed in kraal, watches the socium disintegrate beneath it like an amberfrozen insect.

Maybe the mode of production after all does have an influence on people's

consciousness ?!

The time may come when cemeteries will be re-digitalised to replenish consumer numbers .

(Assets management of the reincarnation [rate of return] through the Kondratieff recycles of samsāra).

[http://www.guo.hu/___WORDPRESS/Laszlo-Hortobagyi_Gayan-Uttejak-Orchestra/_Thoughts_Hortopaedia/2013_Online-reincarnation_\(eL-Horto2013\)_ENG.pdf](http://www.guo.hu/___WORDPRESS/Laszlo-Hortobagyi_Gayan-Uttejak-Orchestra/_Thoughts_Hortopaedia/2013_Online-reincarnation_(eL-Horto2013)_ENG.pdf)

Because, as we have seen above, there is no population replacement, but a necessary enlargements of consumers by imports in order to maintain the compelled mode of production recycled by the 1 % caste society on a global scale, via the help of their economic, political and technological power.

http://www.guo.hu/___WORDPRESS/Laszlo-Hortobagyi_Gayan-Uttejak-Orchestra/_By_The_Way/Apocapitalismo/2011_The_network_of_global_corporate_control.pdf

This is symbolised by the image: a *Gothic* cathedral with a homeless man with AIDS dying at its base.

When the "nature of the *World Systema*" is tumble in China's favour (*Li Taj Po* is rolling in his grave), the current Western "*systema teleion*" will be worth the apocapitalist apocalypticism of its own wasteful "market economy", all despite being forced to introduce the heavenly but glitch UBI practice of "*principle of redemption of all beings*" of Christianity and the original communism, as previously described : of course far from humanistic platforms

At the same time, the growing expansion of *A.I.* and robotization intensifies the brutality of *Janus*-faced „*Systhema*” : while the employed workforce works 12-14 hours a day until the age of 10-50, the sociological excess of capitalism is idly and aimlessly destroying the planet, until the moment when robotics becomes more profitable than living labour, by this time the number of people involved in production will have been reduced to a few hundred million.

It is now the present already.

My previous decade-long view is that the surplus of people made redundant and marginalized in the mythopoetic but detectable "*Kondratyev*"-type cycles of capitalism are now being treated by sex, synthetic drugs, cable TV-film series , *rock-trance* music or everyday *Virtual Reality*, community Medias, *COVID* and the privately owned *Big Data*.

I consider these very obsolete today, because they are less efficient than to cremating the sociological surplus extracted from social homeostasis in the craters of an *Icelandic* volcano, cheaply and ecologically, by refilling a helicopter paternoster system (example: the *Chinook Ch-47* type), loaded in *kanban-lego* mode.

In Europa the most useful are *Eyjafjallajökull*, *Bárðarbunga* in *Iceland*, or *Mount Etna* in *Sicily*.

If this is not possible by the the *Medias*, which are transforming the continents due to the low efficiency and "*immoral imperative*" of the "*Systhema*" 's stinketh flagged funeral system of the *consciousness industry* (*Pearl Harbor*, *Tonkini Bay*, *WTC*,

Iraq, Dimona, Covid, Afghanistan, etc.), then the only humanoid solution right now is to pollute another and the nearest habitable planet (before contamination of the *Galaxy*), as *Rapa-nui* also measures “*fukushima*” and the *Great Barrier Reef*, which accounts for 15% of the earth’s oxygen production capacity, 20% -a has already been destroyed.

It is possible, however, that large corporations will flush the seas (as if this has already begun) in order to maintain the *Pax Peristaltika* global cycle of consumption (*samsāra*) and shift to a more lucrative ecological meat-efficiency practice.

Of course, even with this superficial knowledge of things, I find all this natural, and one thing we can be sure of is that even the current technological high-tech excludes the possible, desirable and future unification of social forces that want change.

Therefore, a real productive *termite*society, crippled for consumption - this is evolutionarily legitimate - is realized, where the growth and the cyclical production *samsāra*, is either forced to transform or trade wars take over the role of traditional wars and/or growth and competition are outsourced to outer space, to the planets, because the only antidote to nuclear world wars on earth is precisely the global-planetary dispersion of the property network of capital structures.

That's what the "*thinkethologists*" species say, the actors of history : they don't know, but they do.

Whether they knew it or not, the life of the citizens of Eastern Europe, for example, was also influenced by the fact that in these *Zones*, after World War II. was temporarily established, a not capitalist but socialist static caste system with crumbly social boundaries (*sociostrata*), in whose late disintegration, not coincidentally, the *Marxist* mutation of the idea of the successful rise to power of the intelligentsia, i.e. the class with the privilege of "knowledge", reappears.

The local drift of history and the "*World Systema*", in synergy with the satanic nature of biological evolution (as we know „*Nature is the temple of Satan*”), seems to have led its original sentient beings to betray and abandon ship, instead of sketching a possible alternative future, or describing a however fictitious but alternative East-European community, but they quickly embedded in the lucrative

corporate sociology and the liberal world order overseen by corporations.

The short existence and extinction story of science fiction is also an excellent example of the virulent survivability of the "*World Systema*" in the general process of deflagration alternative visions through the unconscious homeostasis *Moloch*, where successful visionary writers act as condoms to deflecting and select out competing "ejaculates" of possible systemic alternatives into a problem-free dead-end trajectory.

We can also provide endless roster, including in the field of film and literature: there is no cultural product that names the causes of the suffering of the (exclusively individual) existential structures depicted as "*Systema*" failures.

Each of these 'creations' illustrates the *Faraday* cages of social consciousness cemented and conditioned into the sociostasis of the all-time, as well as the effective *consciousness industry* of *Big Data* holders in creating and maintaining these cages.

At the same is a psychedelic community on this Earth (*Transociety*), with correct values and perseverance, with a new ecological concept, and who, unlike the artificial goodness of religiosity, have a natural view of all living (human-animal) beings'salvation, living their lives in a kind of evolutionary classless solidarity (in *subliminal sociostasis*).

They are the *catacombs* beings of our time, who, however, with their music and culture, leave this world, and thus, as forced subjects of prevailing society, are sociologically disconnected, leak-away, ceasing to be the political base of ideological-power blocks, thus fermenting the possible fate of the world with their growing numbers.

And although there will never be another social revolution on this planet, so when the "*termites*" get left and the foundations of the Empire have been "chewing away" - so litmus paper of the *Mithrasian* „*Good*” „and *Maleficent*” will be this inevitable occurrence - then the "*World Systema*" will collapse. The algorithm is so purely "*quantum biological*" that it can be trusted, it is just a matter of patience: all the fish that croak the ones that ventured ashore - are still fish today...
